G-2, GHQ, FECOM (Through channels)

6 October 1950

Attn: Allied Translator and Interpreter Section
Chief, Foreign Documents Division, Central Intelligence AgencyCoordination of Foreign Language Documents Exploitation by the
Intelligence Advisory Committee AgenciesReference: Consolidated Translation Survey published monthly by CIA Foreign
Documents Division

1. In accordance with recent ID, GSUSA, recommendation to CIA, this will advise that CIA Foreign Documents Division maintains central record and publishes monthly Consolidated Translation Survey of foreign language documents exploited by translation activities of the Intelligence Advisory Committee Agencies.

2. Forwarded herewith are 11 past issues of the monthly CIA Consolidated Translation Survey (Enclosure A). ID, GSUSA, has informed this division that hereafter FECOM will receive this Survey on a monthly basis through normal distribution channels.

3. Foreign Documents Division translations of selected former Japanese Army Medical College research reports may be of interest to ATIS. According to recent ID Reports (ID Nos. 694327, 694328 and 694358), ATIS also is exploiting this material. Therefore it is hoped that this identification of CIA translations may save unnecessary further exploitation by ATIS of the same Japanese documents (Enclosure C).

4. Certain translations and information reports from captured Japanese documents have been duplicated by CIA and by ATIS (Enclosure C).

5. In order to save Allied Translator and Interpreter Section undertaking translations already done in the Zone of Interior, the following procedure is suggested before translations are started:

a. Check Consolidated Translation Survey to determine whether projects are listed as initiated or completed by another agency.

b. Send cable to ID, GSUSA, for CIA Foreign Documents Division, describing foreign document contemplated by ATIS for translation, (providing if possible: title of project in English, author, security classification, foreign language title of source material, date and data of publication). ATIS then will be notified by this Division if document already has been translated or is in process of translation.

SECRET

SECRET

c. If work has not already been initiated or completed according to Foreign Documents Division records, and unless otherwise advised by ATIS, those items described by cable as contemplated by ATIS for translation will be incorporated in the Consolidated Translation Survey as ATIS translation-in-process.

d. ATIS translation projects requiring "Control U.S. Officials Only" handling should be so designated in ATIS cables, so that these projects may be entered in the Supplemental Consolidated Translation Survey with the required limited dissemination.

6. Request for copies of reports listed in Consolidated Translation Survey need refer only to repository and translation numbers given in the Survey.

7. Please notify Foreign Documents Division if ATIS desires identity of any other available information reports and translations prepared by this division, its precedent offices, or by other Intelligence Advisory Committee Agencies participating in the Consolidated Translation Survey, from foreign language documents dealing with Far Eastern subjects. Some of these reports and the original documents (often only partly exploited), including captured Japanese material of basic intelligence interest, received limited distribution at the time of their earlier processing in the Zone of Interior.
